

Mathematics I

The first graph is a summary showing the percentage of students district wide and at each grade level who are meeting or exceeding proficiency. These results become even more impressive when you look at district wide and cohort progress over time. The chart that appears below shows results both district wide and at each grade level across the past three years. The various highlighted areas follow a particular cohort or graduating class of students across the past three years of assessments. Cohorts have maintained impressive levels of proficiency and in several cases shown improvement, clearly indicating the effectiveness of our program and staff, as well as the hard work of our students.

Percent of Students Performing At or Above Proficiency (Level 3 or 4)

NYS Math Assessment:

	06-07	07-08	08-09
District	70	83	91
Grade 3	96	96	96
Grade 4	87	95	95
Grade 5	67	81	92
Grade 6	78	86	83
Grade 7	66	80	92
Grade 8	36	60	89

The second graph showcases the percentage of Coxsackie - Athens students performing at or above proficiency at each grade level and district wide, in comparison to their peers, county and statewide. At all grade levels, performance of Coxsackie - Athens students is beyond that of their peers, across the county and state.

Percent of Students Performing At or Above Proficiency 2009 NYS Math Assessment:

A comparison to the county and state

	C-A	Greene County	NYS
Grade 3	96	92	93
Grade 4	95	83	87
Grade 5	92	87	88
Grade 6	83	82	83
Grade 7	92	91	87
Grade 8	89	82	80
3 - 8	91	86	86
